WOOD BURNING STOVE FROM CHARNWOOD

The Country Living Bembridge is an innovative new wood burning stove made on the Isle of Wight by British stove manufacturers Charnwood.

Featuring a removable door handle, one single air control and an integrated inlet for ducting external air, The Bembridge burns exceptionally clean with outstanding efficiency.

The Bembridge meets the DEFRA requirements for smoke control exemption; allowing wood to be burnt in smoke control areas.

The stove is available in a choice of 5 colours with options including a store stand, to raise the stove off the hearth, and a reciprocating grate for ease of cleaning when burning wood.
